LET'S
GET
INTRODUCED...

**IN 2015 WE WERE PIONEERS IN WATER BASED SOLUTIONS.
WE REMAIN SO TODAY.**

WHO WE ARE

JADE is the brand of ColourMax Lanka (Pvt) Ltd & associated with Infichem Australia, Patcham UAE and entered the Sri Lankan market in 2013 with creative ideas and new concepts while offering low to ultra-low VOC water borne paints for a variety of substrates. We liaise with Global Coatings Experts and Raw Material Suppliers directly in order to achieve desired product performance of our formulations.

We have proved that we are in a position to fulfill specific paint requirements for our customers who are looking for high performance water borne products to apply on complicated substrate conditions.

WE OFFER

We are always conscious to make our products far superior by formulating unique formulations. Our expert knowledge, sourcing high performance raw materials and latest technologies from our global relationships are the key factors in achieving this goal. Authorizing MSDS in GHS format for our export oriented products are done by an Australian company who is a specialist in that area.

In addition, the manufacturing process of Colour Max Lanka will have no environmental impacts. Its environmentally friendly, water based products are categorized as low to ultra-low VOC. It does not use any carcinogenic, mutagenic or sensitizing raw material that has impact to the environment, consumers and employees

OUR VISION

*Our vision is the harmonious
Integration of water based
Products with the community*

CONCEPT OF WATER BASED SOLUTIONS

Making Green Products.

Volatile Organic Matters in paints can adversely support global warming by releasing Green House Gases to the environment and other non volatile ingredients in paints also can disrupt environment. Therefore, Colour Max highly considers on raw material selection for its innovations and always liaise with renowned Global Suppliers.

Environment-friendly Manufacturing

Colour Max Lanka applies industry-leading initiatives in mitigation of Global Warming, reduction of harmful substances to human, environment and water resources in its production processes

Advantages are:-

- Environment friendly
- Easy to Handle, Use & Clean
- Low VOC (Volatile Organic Content)
- Low Order
- Long Lasting & Durable
- User Friendly

OUR R&D POLICY

Colour Max Company supports innovation through continuous research and development. It is our constant endeavor to provide superior products to our clients.

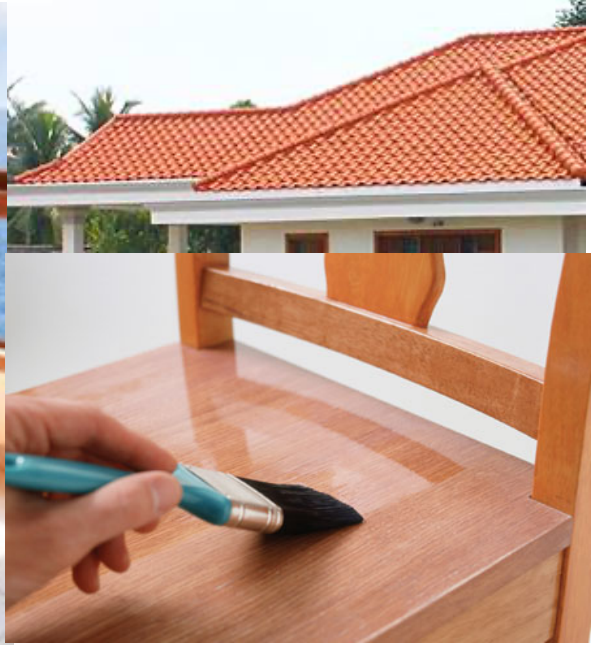

The raw material selection procedure is based on internationally accepted standards by their Material Safety Data Sheets and Technical Data Sheets followed by R & D work. Colour Max is planning for achieving global certifications for safety & environmental friendliness.

Waste disposal and wastewater treatment has been planned in accordance with local and international standards. The generation of wastewater from its production will also be minimal because of its product portfolio, its unique formulations and process.

Two Coats Protection & Beauty
For Metal Surfaces

ALL IN ONE

ALL IN ONE

“ALL IN ONE ” is water based, eco-friendly, high performance, colour finish designed for Interior and Exterior wooden Surfaces .

This two-in-one product offers both colour and finish coat, thus replacing the requirement of applying two separate coats of colour and top coat.

It can be chosen from many popular colours. This easy-to-use, user friendly product provides optimum durability, water resistance, Algae & Fungal resistance, colour retention and longevity for wooden ceilings. It can also be applied on plaster board ceilings to give it timber-like appearance.

EXTERIOR MARINE SEALER

“Exterior Marine Sealer” is water based, eco-friendly, high performance, colour finish designed for exterior wooden decks.

This Three-In-One product offers both Primer, colour and finish coat, thus replacing the requirement of applying two separate coats of primer, colour and top coat. It can be chosen from many popular colours.

This easy-to-use, user friendly product provides optimum durability, water resistance, salt spray resistance, UV resistance, Algae & Fungal resistance, colour retention and longevity for timber decking.

METASHIELD

ANTI CORROSIVE METAL PRIMER

JADE Anti Corrosive Metal Primer is eco-friendly water based pigmented coating designed to provide corrosion resistance to metal substrates. This innovative product dries quickly while offering excellent adhesion & hardness. It is based on a blend of resins & additives specially chosen for excellent substrate binding & corrosion resistance characteristics on metal substrates.

WOODSHIELD

INTERIOR & EXTERIOR WOOD STAIN

Woodshield Interior & Exterior Wood Stain is water based eco-friendly, high performance stain for interior and exterior wooden products such as doors, windows, furniture & structures.

It can be chosen from many popular colours and is designed to apply prior to applying Interior & Exterior Clear Top Coat. This easy to use, user friendly coating system provides optimum durability, water resistance, block resistance, colour retention & longevity for wooden surfaces.

INTERIOR & EXTERIOR CLEAR TOP COAT

Woodshield Interior & Exterior Clear Top Coat is water based, eco-friendly, high performance, clear finish for interior and exterior wooden products such as doors, windows, furniture & structures. The product has been designed to apply over Interior & Exterior Wood Stain which can be chosen from many popular colours. This easy to use, user friendly coating system provides optimum durability, water resistance, block resistance, colour retention & longevity for wooden surfaces.

INTERIOR CLEAR FLOOR VARNISH

Interior Floor Varnish is eco-friendly, water based, hard wearing decorative finish designed to protect timber floors against staining, soiling and algal & fungal growth in addition to its water repellence. It repels moisture and water from the substrates while offering excellent scratch & abrasion resistance. It can be applied on interior floors & this is easy to clean due to its excellent dirt - pick up resistance. Excellent waterproofing properties and resistance to household chemicals & detergents of the product contributes to extended life time of the substrates by protecting from damaging water & aggressive water-borne salts & biological attack.

WET LOOK PAVING SEALER

Wet Look Paving Sealer is eco-friendly water based, hard wearing clear sealer designed to repel moisture and water from porous construction paving materials. It can be applied on both interior and exterior floors such as interlocking pavers, natural stone surfaces & slate, terracotta and clay tiles.

This innovative product forms a clear film on the substrate to assist against efflorescence, staining, soiling and algal & fungal growth in addition to its water repellence. It gives wet look to the substrate & enhances the natural colour and therefore appearance of the substrate will be enriched. Wet Look Paving Sealer is ideal for sealing both interior and exterior natural & reconstituted surfaces and highly trafficable surfaces. This product has excellent hot tire pick up resistance. It has excellent chemical & alkali resistance and self-cleaning ability due to its excellent dirt – pick up resistance.

EXTERIOR PLASTER SEALER

Exterior Plaster Sealer is eco-friendly water based, flexible & hard-wearing clear sealer designed to repel moisture and water from non -masonry substrates such as painted walls. This innovative product forms a clear film on the substrate to assist against staining from tree sap & birds' droppings, soiling and algal & fungal growth in addition to its water repellence.

EXTERIOR WALL AND ROOF SHIELD

Exterior Wall & Roof Shield is self-priming, eco-friendly water based, hard wearing decorative coating designed to protect exterior walls & roofing materials. It can be applied on exterior walls and roofing materials such as cement, terracotta & clay roof tiles and asbestos sheets.

This innovative product forms a decorative coating on the substrate to assist against algal & fungal growth in addition to its water repellence.

This water-based product will dust proof and stabilize the substrate. Therefore, it will prevent generation of asbestos fiber dusts & degradation of the roof due to ingress of water. Exterior Wall & Roof Shield is a flexible but tough product which has self-cleaning ability due to its excellent dirt – pick up resistance. Excellent waterproofing properties of the product contributes to extended lifetime of the substrates, especially reinforced concrete structures, by protecting from damaging water & aggressive water-borne salts such as chloride ions, efflorescence, carbonation, alkali silica reaction & biological attack.

EXTERIOR MASONRY SEALER

Exterior Masonry Sealer is eco-friendly water based, flexible & hard-wearing clear sealer designed to repel moisture and water from masonry materials such as concrete, brick & clay. Exterior Masonry Sealer has self-cleaning ability due to its excellent dirt – pick up resistance. Excellent water repellency properties of the product contributes to extended life time of the substrates, especially reinforced concrete structures, by protecting from damaging water & aggressive water-borne salts such as chloride ions, efflorescence, carbonation, alkali silica reaction & biological attack.
